

Roller shutter switch ET Shutter Matter

The ET Shutter Matter is a smart roller shutter switch that integrates seamlessly into Matter-based smart home systems. The unified communication standard enables cross-platform use with systems such as Apple Home, Google Home, Amazon Alexa and SmartThings. Thanks to local communication and Matter certification, the system offers a high level of security and reliable control.

Whether it's in the morning when you wake up, for sun protection in the afternoon or to block out the light in the evening – the ET Shutter adapts flexibly to your daily routine. Control your roller shutters conveniently via the app or integrate the Shutter into scenes and routines within your smart home system.

Technical data

Supply voltage:	230 V / 50 Hz
Dimensions (WxHxD):	70 x 70 x 35 mm
Weight:	55 g
Installation:	Switch adapter for Busch-Jaeger, Gira and Merten
Protection class:	IP20
Area of application:	Indoor
Max. power consumption standby:	0,2 W
Cable type:	rigid and flexible
Type:	Roller shutter actuator
Cable cross-section:	0,2-1,5 mm ²
Operating temperature:	0 to +40°C
Max. switching capacity:	575 W / 2,5 A / 230 V
Relay type:	2x normally open contacts, μ contact
Suitable for:	Roller shutter with an internal limit switch
Scope of delivery:	ET Shutter Matter, Instruction manual, Switch adapter for Busch-Jaeger, Gira and Merten, 2x mounting screws (3.2x15mm)

Radio standard

Communication:	Matter over WiFi
Frequency range:	2,4 GHz
Typical radio transmission power:	+8 dBm

Functions

- Schedules can be set up individually
- The roller shutters can be controlled manually at any time using the switch
- The current status of the roller shutter (open, closed, moving) is visible in the app*
- The end positions of the roller shutters can be automatically detected during setup via a reference run
- It is possible to set a percentage position (e.g. 50% open) – ideal for privacy and sun protection
- The shutters can also be controlled remotely
- A motor fault or overcurrent is indicated on the device by a red LED
- The ET Shutter Matter can also be controlled manually via the switch without a connection to a smart home system

*Functionality depends on the smart home system used
