

Heating Actuator Comet Zero Bluetooth

The Comet Zero Bluetooth electronic radiator thermostat enables convenient and energy-efficient temperature control. Using the ET Blue app, the thermostat can be conveniently controlled via Bluetooth – without the need for Wi-Fi or additional devices.

Heating and energy-saving periods can be set individually and optimally adapted to your daily routine. Programming is easily carried out via the app. If required, the temperature can also be adjusted manually on the thermostat at any time. In addition, the Comet Zero Bluetooth features practical functions such as an open-window detection feature and a key lock for greater safety and efficiency in everyday life.

Technical data

Supply voltage:	2x 1,5 V LR6 / AA-Batterie
Adjusting force:	> 100 N
Temperature at the valve:	+20°C to +120°C
Battery life:	approx. 2 years
Temperature range:	8°C to 28°C
Dimensions (WxHxD):	60 x 65 x 85 mm
Weight:	161 g (inkl. Batterie)
Installation:	M30x1,5 mm, Valve RA, RAV, RAVL (Metal adapters are available for other valves)
Protection class:	IP20
Area of application:	Indoor
Scope of delivery:	Comet Zero Bluetooth, Instruction manual Adapter set (RA,RAV,RAVL)

Radio standard

Communication:	Bluetooth
Frequency range:	2400 - 2483,5 GHz
Typical radio transmission power:	-20 dBm - +20 dBm

Environmental conditions

Operating temperature:	0 to +40°C
Ambient humidity:	0 to 95 %
Storage and transport conditions:	Temperature -20°C to +80°C Relative humidity max. 95%

Functions

- Daily or weekly times can be customised in the ET Blue app
- Customisable heating and economy periods
- Open window detection
- Manual adjustment possible at any time using the buttons on the thermostat
- Automatic summer/winter time changeover
- Holiday function
- Key lock
- Frost protection function
- Limescale protection function
