

Gateway ET Home Link

The ET Home Link Gateway is the central hub for your Comet Zigbee or Comet Zero Zigbee thermostats. Using Zigbee, it reliably connects all compatible devices and enables convenient control via the ET Home Link app. This allows you to customise heating profiles, precisely regulate temperatures in individual rooms and achieve targeted energy savings. With the ET Home Link, you can enjoy maximum control, flexibility and convenience for your smart heating system – anytime, anywhere.

Technical data

Supply voltage:	Micro-USB, 5V
Dimensions (WxHxD):	68 x 68 x 24 mm
Weight:	40 g
Range of reception:	approx. 70 m (open space)
Number of controllable devices:	60 units
Protection class:	IP20
Area of application:	Indoor
Scope of delivery:	Gateway ET Home Link, Instruction manual, power cable Micro-USB 5V

Radio standard

Communication:	ZigBee 3.0
Frequency range:	ZigBee: 2,4 GHz ; WLAN: 2400 MHz ~ 2483,5 MHz
Typical radio transmission power:	ZigBee: 8dBm
	IEEE 802.11b: 19 dBm
	IEEE 802.11g: 19 dBm (6 Mbps)
	IEEE 802.11g: 15 dBm (54 Mbps)
	IEEE 802.11n: 19 dBm (MSC0)
	IEEE 802.11n: 15 dBm (MSC7)

Environmental conditions

Operating temperature:	0 to +40°C
Ambient humidity:	0 to 95 %
Storage and transport conditions:	Temperature -20°C to +80°C Relative humidity max. 95%

Functions

- Centralised control of all Comet Zigbee and Comet Zero Zigbee thermostats
- Daily or weekly times can be customised in the app ET Homelink
- Customisable heating and economy periods
- Convenient control of temperature and schedules, managed centrally
